

# Key and Unkey Transmitter Testing using c.exe

**Note: Radio Modem must be in Packet Switched Mode**

## Required Files:

c.exe  
c.dat

## Command codes:

c 22 n: Sends command n to com1 (default as defined in c.dat)

c 22 1: Keys and transmits random data

c 22 2: Keys and transmits unmodulated carrier

c 22 5: Unkeys transmitter

**Warning!** Do not key transmitter for longer than 30 seconds. This utility is normally used in an engineering capacity and does not provide a automatic turn off time out. Damage to your radio may result form improper usage.

**Note: Cycle power or perform c 22 5 within 30 seconds to avoid overheating.**
