 full functionality  no functionality

Notes:

1. Most unlikely, not mentioned configurations also work (e.g. old AutoCAD releases with newer operating systems). Autodesk itself is not giving any guarantee here. Since kubit software solutions are AutoCAD applications, there is also no guarantee from our side.
2. In any case of compatibility problems, we recommend updated driver installations. In this case please contact the kubit support at support@kubit.de, or +49-351-41767-25. In this, kubit would be happy to inform you about recommended update possibilities.
3. Please be aware that there are differences to other AutoCAD-Applications (LT, Map, Civil, Architecture). If you are not sure which configuration can be used for kubit-Products do not hesitate to contact our kubit-support at +49-351-41767-25 or support@kubit.de.
